

# Principles of Programming Languages

## Lecture 7: SIMPLE.

Andrei Arusoaie<sup>1</sup>

<sup>1</sup>Department of Computer Science

November 14, 2017

# Outline

SIMPLE

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP
- ▶ Features:

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP
- ▶ Features:
  - ▶ expressions (with side-effects), assignments, loops, decisional stmt, blocks

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP
- ▶ Features:
  - ▶ expressions (with side-effects), assignments, loops, decisional stmt, blocks
  - ▶ functions + call-by-value

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP
- ▶ Features:
  - ▶ expressions (with side-effects), assignments, loops, decisional stmt, blocks
  - ▶ functions + call-by-value
  - ▶ multi-dimensional arrays

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP
- ▶ Features:
  - ▶ expressions (with side-effects), assignments, loops, decisional stmt, blocks
  - ▶ functions + call-by-value
  - ▶ multi-dimensional arrays
  - ▶ threads + synchronization

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP
- ▶ Features:
  - ▶ expressions (with side-effects), assignments, loops, decisional stmt, blocks
  - ▶ functions + call-by-value
  - ▶ multi-dimensional arrays
  - ▶ threads + synchronization
  - ▶ exceptions

# This lecture....

- ▶ ... is about SIMPLE: an imperative language larger than IMP
- ▶ Features:
  - ▶ expressions (with side-effects), assignments, loops, decisional stmt, blocks
  - ▶ functions + call-by-value
  - ▶ multi-dimensional arrays
  - ▶ threads + synchronization
  - ▶ exceptions
- ▶ DEMO: explore and learn how to read a K definition

# Lab this week

- ▶ Test!
